December Virtual CAG Meeting

Tuesday, December 15, 2020

5:30 PM

See Zoom details at end of this newsletter.

Fran Aguirre, CAG Administrator
& Community Leader

Dear CAG Family and Friends,

Our EPA recognized CAG family continues to grow with the addition of new community members and additions to our hard working Advisory Board. We are happy to announce that Adrian Pike, longtime Globeville resident, member of Globeville First, with a career behind him in medical research and Yadira Sanchez, community leader, Swansea resident and family small business

owner, have joined the CAG as voting members. Yadira was recently featured in the new film [The Human Element](#). Password: THE-AIR. See Yadira at minute 7:11

We also welcome [Marie Venner](#), of Together Colorado with a long and varied career in government, journalism, community organizing and legislative affairs, to the distinguished CAG Advisory Board.

Since 2016, with the help of our volunteer experts and researchers, we have learned and discovered much about Superfund, geology, water, toxic pollution, impacts of pollution on our bodies, engineering, laws, regulations, [environmental racism](#) and the struggle for justice that is [sweeping](#) the United States.

We have an informative and perhaps transformational program lined up for January and February and the rest of 2021. We have invited scientists, health care providers ,community leaders, politicians, educators and others to join our virtual meetings. Education and enlightenment leads to powerful change.

I want to hear from you. Please click on the link below to email me.

All of my blessings to each of you and and may you have a peaceful and joyful holiday season.

Peace & Love,

Fran Aguirre

CAG Administrator

January CAG Featured Speaker

Environmental Justice

The CAG extends a warm welcome to Jill.

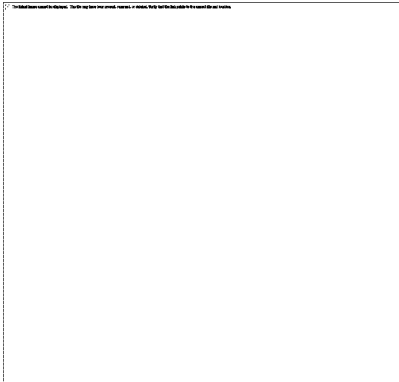

Jill Harrison *Click on image.*

"Jill Lindsey Harrison (PhD, University of California at Santa Cruz, 2006) is Associate Professor of Sociology at the University of Colorado at Boulder. Her research focuses on environmental sociology, sociology of agriculture and food systems, environmental justice, political theories of justice, and immigration politics, with a regional emphasis on the United States. She has used her research on political conflict over agricultural pesticide poisonings in California, recent escalations in immigration enforcement in rural Wisconsin, and

government agencies' environmental justice efforts to help identify and explain the persistence of environmental inequalities and workplace inequalities in the United States today. In addition to numerous articles and chapters, she published *Pesticide Drift and the Pursuit of Environmental Justice* (MIT Press, 2011), which won book awards from the Rural Sociological Society and the Association of Humanist Sociology, and *From the Inside Out: The Fight for Environmental Justice within Government Agencies* (MIT Press, 2019).

'Chuck Norris

CAG Technical Advisor

Chuck Norris *Click on image.*

Comments & Recommendations:

Stantec's Technical Memorandum on Scoping the Revised Remedial Investigation for **Ex. 6 Personal Privacy (PP)**, OU2, Revision 1.

Chuck Norris has been an invaluable asset to the CAG. His unparalleled background in Hydrology/Geology, his meticulous attention to even the most minute detail, his formidable research skills and his vast knowledge and experience with Superfund and other toxic clean up programs, have made him a force to be reckoned with for agencies, contractors and regulators. The CAG is proud to promote his ongoing work and we are grateful for his assistance.

The CAG offered EPA, Denver and CDPHE, Mr. Norris' valuable input to this report as it was being developed. Unfortunately for the CAG and for the tax payers of Denver, that offer was rejected by EPA and others.

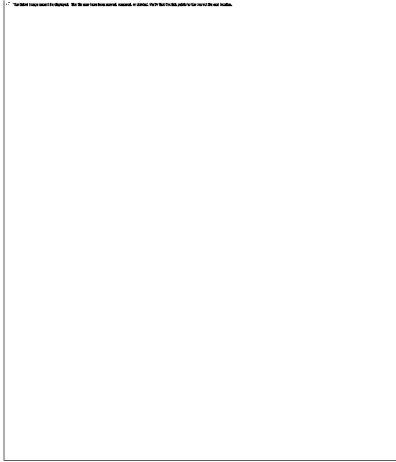

This report may form a basis for the all important Remedial Investigation of OU2 that will impact residents of the communities this EJ Site.

When Chuck began to ask the hard questions about pollution and methods, the EPA and Denver declined to attend CAG meetings from then on. For the sake of the impacted residents , we hope they will come back to the CAG table.

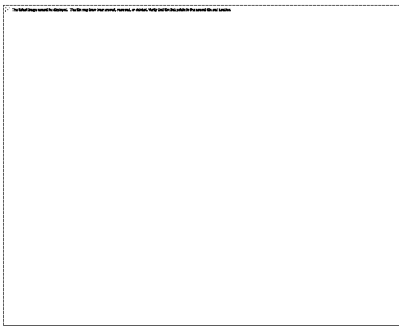

Environmental Justice Champions

Senator Corey Booker

Click on image to view video.

Vice President Kamala Harris

"Environmental racism fuels disparities in environmental and public health and its impacts can be seen across society."

"Her addition to Team Biden will focus a new spotlight on an issue Harris has championed in the Senate: addressing the racism of environmental pollution." [Mother Jones](#)

The Endocrine Society Comes to Denver

Speakers to be announced.

February 16, 2020 /5:30

CAG Virtual Meeting

The Endocrine Society, researchers and clinicians, is 18,000 members strong.

They are on the cutting edge of the science of the impact of even very low levels of ED like lead and asbestos that exists in the Superfund Site. Read the Endocrine Society [Statement](#) , on Endocrine Disruptors, 2015.

The  Superfund Site contains many health destructive metals and man made chemicals that are called endocrine disruptors (ED).

Hormones, our endocrine system, control and impact almost every function in our body. EDs contribute to many lifelong, devastating health and behavior problems.

December CAG Meeting will be Brief

The December CAG meeting will be brief. We will allot time for EPA, CDPHE and Denver to give their usual updates on happenings in the Site and then we will adjourn for a community holiday gathering.
